

VESSEL LIFECYCLE PROGRAM

OVERVIEW

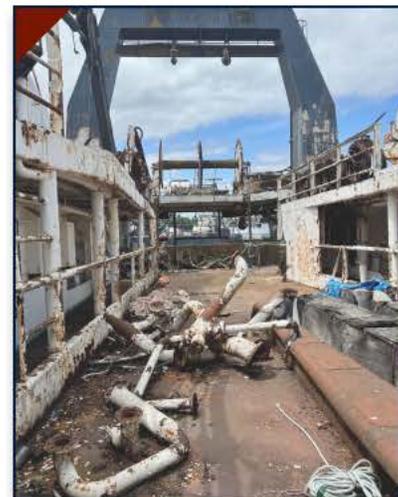

Stabbert Maritime's Vessel Lifecycle Program offers a streamlined, compliant, and fully managed solution for commercial vessel owners looking to offload aging or derelict vessels in the Pacific Northwest. Our turnkey approach includes towing, deconstruction, and insurance coverage—ensuring peace of mind from start to finish.

WHY OWNERS CHOOSE STABBERT

We understand that disposing of large commercial vessels can be costly, time-consuming, and legally complex. That's why our program is built around ease, speed, and assurance. Once under contract, we take full ownership of the vessel—removing the burden of liability and future risk from your operation.

KEY PROGRAM FEATURES

- Turnkey Service: We handle towing, insurance, and full deconstruction.
- Vessel Size Range: Accepting steel/commercial hulls between 50' - 400' LOA
- Owner Protection: We assume legal and environmental responsibility
- Discreet & Flexible: Project-specific details available upon request.
- Fully Compliant: Operates under state and federal maritime disposal regulations.

Commercial vessel owners in the Pacific Northwest with aging, inactive, or hard-to-sell vessels that are taking up dock space, costing in maintenance, or no longer viable to operate, we can help.
